Invitation

Dear Colleagues,

Organizing committee and **Oncology Forum** office bearers are pleased to invite you to participate in **OFCON-2025, the 7th Annual Conference of Oncology Forum, Delhi** which is going to be held at **Indraprastha Apollo Hospital, Delhi on 18th and 19th January 2025**.

Oncology Forum represents Delhi-NCR oncologists including surgical, medical, radiation oncologists, onco-pathologists, onco-radiologists, psycho-oncologists & onco-anesthesiologists. Oncology Forum is committed to bring Delhi- NCR oncologist on a single platform to standardize the oncology practice in the community and on that path, we were able to attain the same in last one decade. Under the aegis of Oncology forum, we have successfully conducted many national conferences like ICC 2013, IASO NATCON 2021 and left a meaningful impact on oncology community. This year Oncology forum has also become the member of UICC (Union for Cancer Control) and is contributing to world cancer care.

"Innovations & Advances in Oncology Impact on Real Life Practice" is the theme of 7th annual conference of Oncology Forum

Recent years have witnessed transformative innovations and advances in oncology, revolutionizing cancer diagnosis, treatment, and patient care. Breakthroughs in minimally invasive surgeries like robotic surgeries, stereotactic body radiotherapy (SBRT) immunotherapy, targeted therapies, and precision medicine have significantly improved treatment outcomes and quality of life for patients. Advances in liquid biopsies, artificial intelligence-assisted imaging, and next-generation sequencing enable earlier detection and more accurate diagnosis. Immunotherapies like checkpoint inhibitors and CAR-T cell therapy have demonstrated remarkable responses in various cancers. In real-life practice, these innovations translate to improved survival rates, enhanced patient outcomes, and personalized treatment plans. Moreover, ongoing research in cancer genomics, epigenetics, and synthetic lethality holds promise for future treatment strategies. These advancements have shifted the paradigm in the field of oncology towards more effective and better outcomes offering new hope to patients affected by cancer.

The Scientific program is dedicated to "Innovations and advances in Oncology" and to review the impact in real life practice.

We are looking forward to host you at Indraprastha Apollo Hospitals, New Delhi under the aegis of
Oncology Forum.
